**Directors' Award for "Making  
others great".**  
Microsoft.

2017

### MAJOR PROJECTS

#### Microsoft Stream Mobile

As a Lead Designer, I am responsible for designing a HVC (high value control) on mobile that empowers users with video jobs across Microsoft Apps. Creating an experience that works for multiple apps and scenarios, was a challenge.

Planning product strategy and ship the new app is my present role.

#### Microsoft Teams Polls

I have designed the Polls experience within Microsoft Teams. Along with Web-Desktop, I also designed them for the Mobile.

This work helped laying foundation and design system. My designs are now part of Microsoft Forms and is being widely used across organizations and Teams meetings.

#### Microsoft Kaizala Actions

I have designed a design system for Actions in Microsoft Kaizala. A micro app framework within chat that helps in increased productivity.

With this project I got to design for multiple domains such as Payments, Decision making, Task management, Location tracking in a chat productivity space.
