▼ WORK EXPERIENCE

UX DESIGN INTERN IBM INDIA

My role as a UX designer with team Rational was to design a UX cycle for a new cloud testing service application. I took an approach of **Generative research**, which was to get the product requirements and features from user interviews. After producing insightful requirements, I used them for my concept generation. I had created detailed product wireframes, Mid-Fidelity screens, Data viz., trend interactions and visual design during the whole project.

2014

SYSTEMS ENGINEER TATA CONSULTANCY SERVICES

With TCS I was part of Owens Corning project. I was a **Subject Matter Expert (SME)** in an IT support client environment. Working with TCS really helped in developing my technical and programming skills.

📍 PUNE, IND

2011-2013

GRAPHIC DESIGNER SOFMYND COMPUTER SOLUTIONS

With sofmynd I had lot of opportunity with the whole team to take **branding and web design projects** for various clients. It was a crucial phase of my life as it was a self initiated startup, which brought a lot of management responsibilities. Later we shifted our focus toward students and started organizing **seminars and workshops** in colleges and universities. The journey got me lot of management and public speaking skills and earned great deal of satisfaction with the work produced.
